Order entry: Order types explained

Market Price	Limit	SL Market	SL Limit

○ Place order at Market price for quick execution.

Market Price	Limit	SL Market	SL Limit

○ Specify preferred price to place order.
○ Orders can be placed only within the defined range as per Daily Price Range **(DPR)** as defined by the exchanges.

Market Price	Limit	SL Market	SL Limit

○ Reduce risk by Stoploss entry Market orders.
○ Set trigger price & order will be executed at Market price once the trigger price is hit.

| Market Price	Limit	SL Market	SL Limit

○ Entry SL trigger price - can be used by the trader to trigger a limit order at a predetermined price.
○ Define the range between the Trigger price & Limit price to avoid slippage.
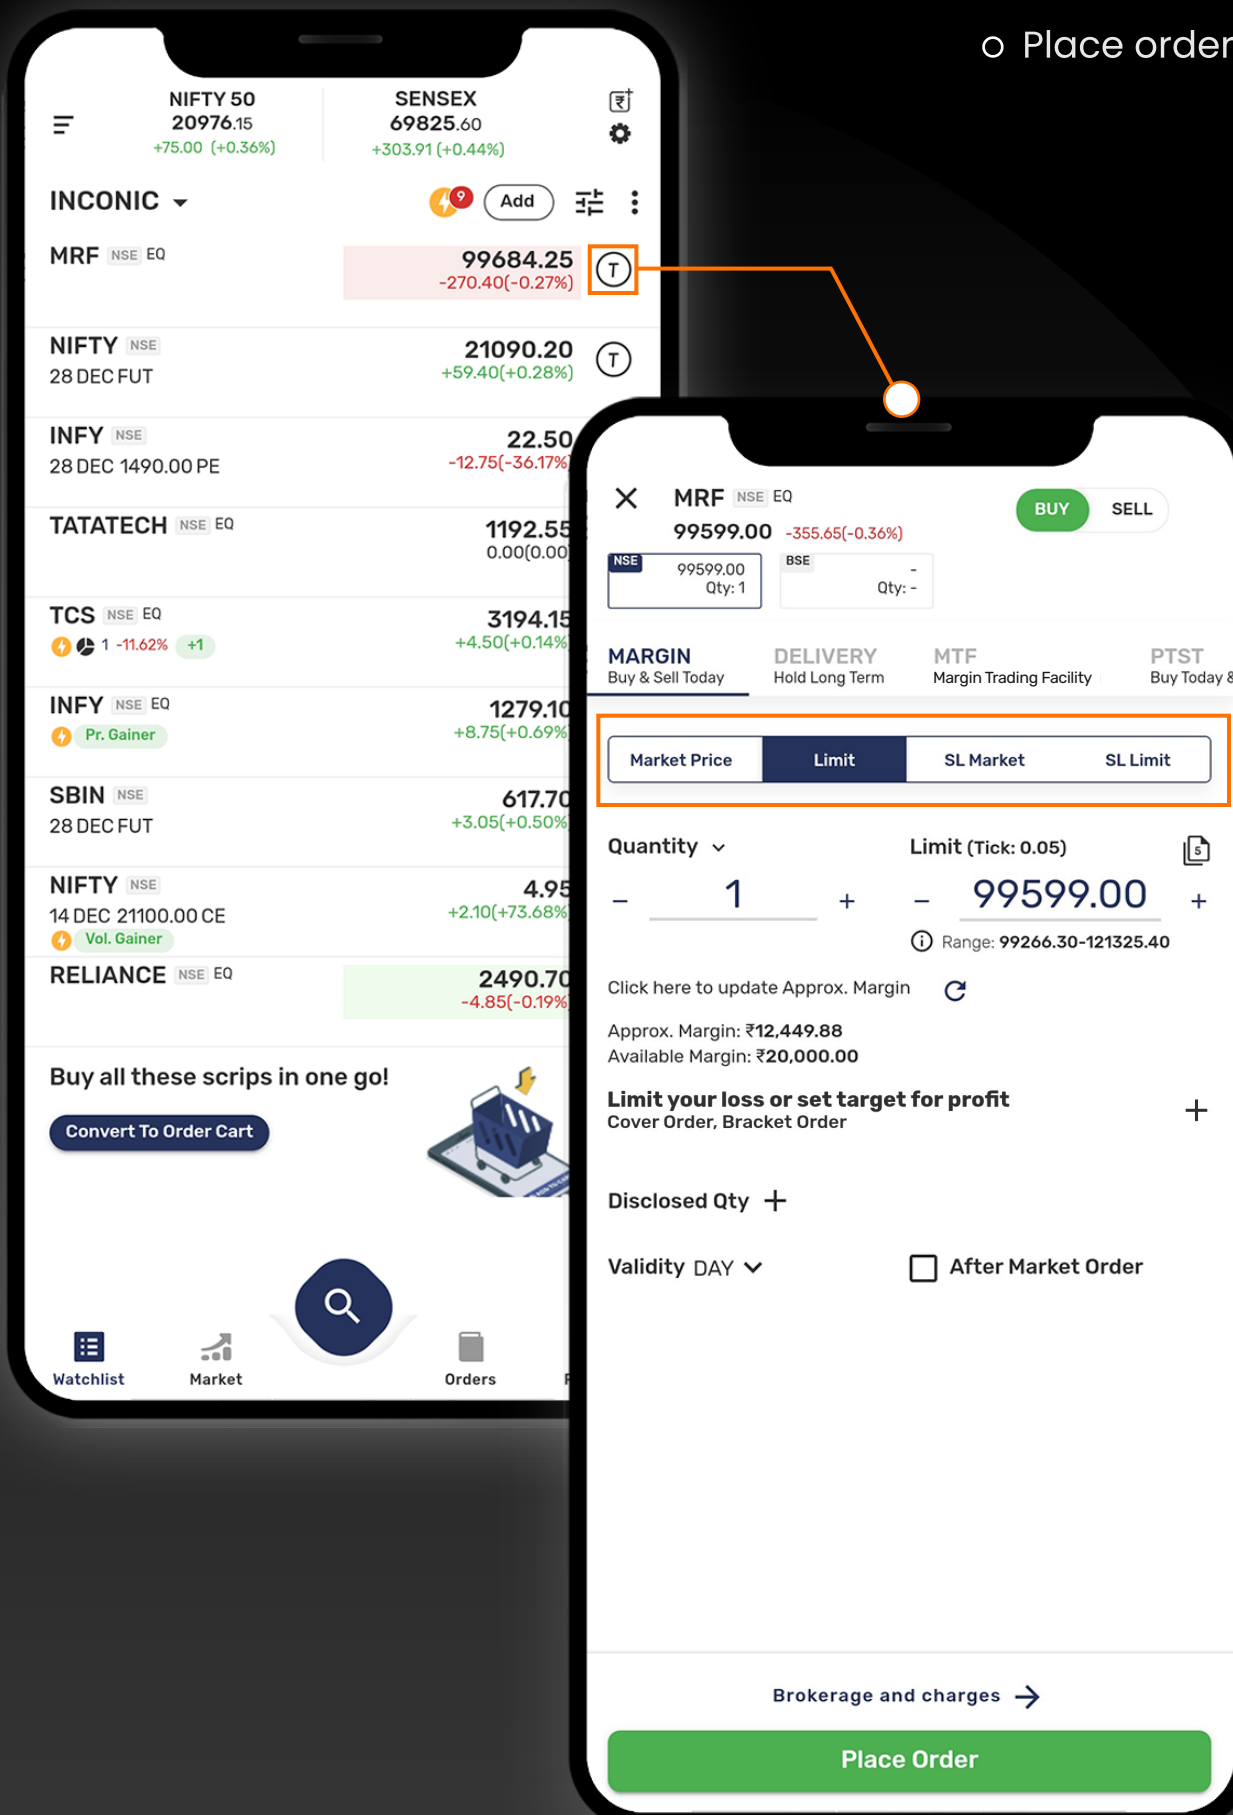

Other important features in order window

Qty drop down :

1. **Quantity** - Qty to be added in absolute numbers.

2. **Lot** - Qty can be added in terms of number of lots for F&O only. E.g., if Lot for NIFTY entered as 2 it will auto-calculate Qty as 100.

3. **Amount** – Approx. Qty & Lots will be calculated according to the amount entered for Equity & F&O respectively.

4. Set the option as default by clicking on ❤.

Select

- ○ Quantity ♡
- ⦿ Lot ❤
- ○ Amount ♡
